

Information Circular: FQF Trust

To: Head Traders, Technical Contacts, Compliance Officers, Heads of ETF Trading, Structured Products Traders

From: NASDAQ / BX / PHLX Listing Qualifications Department

Date: September 7, 2011

Exchange-Traded Fund	Symbol	CUSIP #
QuantShares U.S. Market Neutral Momentum Fund	MOM	351680103
QuantShares U.S. Market Neutral Size Fund	SIZ	351680400
QuantShares U.S. Market Neutral Quality Fund	QLT	351680509
QuantShares U.S. Market Neutral Anti-Momentum Fund	NOMO	351680608

Background Information on the Funds

The FQF Trust (the "Trust") is a management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The Trust consists of several exchange-traded funds (each, a "Fund" and collectively, the "Funds"). This circular refers only to the Funds listed above. The shares of each of the Funds listed above are referred to herein as "Shares." FFCM LLC (the "Advisor") is the investment advisor for the Funds.

MOM seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Momentum Index (the "Target Momentum Index") by investing at least 80% of its net assets (plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Momentum Index. The Target Momentum Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market's overall movements.

The universe for the Target Momentum Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index ("universe"). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Momentum Index identifies approximately the 20% of the securities with the highest momentum within each sector as equal-weighted long positions and approximately the 20% of securities with the lowest momentum within each sector as equal-weighted short positions. A stock's momentum is based on its total return, which is a function of price performance and dividend returns over the first twelve of the last thirteen months. High momentum stocks are those stocks with higher total returns, and low momentum stocks are those stocks with lower total returns.

Although it is expected that the Fund's assets will be invested in all of the long and short positions that comprise the Target Momentum Index, the Fund may use a sampling strategy to track the performance of the Target Momentum Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Momentum Index that, collectively, have an investment profile correlated with the Target Momentum Index. In either case, the weightings of the long and short positions in the Fund's portfolio may differ from their weightings in the Target Momentum Index.

For the Fund, momentum investing entails investing in securities that have had above-average recent returns and shorting securities that have had below-average recent returns. The performance of the Fund will depend on the differences in the rates of return between its long positions and short positions. For example, in a rising market, if the Fund's long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Momentum Index, which the Adviser believes will help the Fund track its Target Momentum Index. Such instruments are expected to include long and short common stocks not in the Target Momentum Index, derivatives, including swap agreements based on the Target Momentum Index and futures contracts on equity indexes, and money market instruments.

The Target Momentum Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the highest momentum within that sector as long positions and the 20 securities with the lowest momentum within that sector as short positions. If between reconstitutions the value of short positions in the Target Momentum Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Momentum Index will be rebalanced back to equal weights and sector neutrality. The Target Momentum Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Momentum Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

SIZ seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Size Index (the "Target Size Index") by investing at least 80% of its net assets (plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Size Index. The Target Size Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market's overall movements.

The universe for the Target Size Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index (“universe”). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Size Index identifies approximately the 20% of the securities with the smallest market capitalizations within each sector as equal-weighted long positions and approximately the 20% of securities with the largest market capitalizations within each sector as equal-weighted short positions.

Although it is expected that the Fund’s assets will be invested in all of the long and short positions that comprise the Target Size Index, the Fund may use a sampling strategy to track the performance of the Target Size Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Size Index that, collectively, have an investment profile correlated with the Target Size Index. In either case, the weightings of the long and short positions in the Fund’s portfolio may differ from their weightings in the Target Size Index.

For the Fund, size investing entails investing in securities within the universe that have below-average market capitalizations and shorting securities within the universe with above-average market capitalizations. The performance of the Fund will depend on the differences in the rates of return between these long positions and short positions. For example, in a rising market, if the Fund’s long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Size Index, which the Adviser believes will help the Fund track its Target Size Index. Such instruments are expected to include long and short common stocks not in the Target Size Index, derivatives, including swap agreements based on the Target Size Index and futures contracts on equity indexes, and money market instruments.

The Target Size Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the smallest market capitalization within that sector as long positions and the 20 securities with the largest market capitalization within that sector as short positions. If between reconstitutions the value of short positions in the Target Size Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Size Index will be rebalanced back to equal weights and sector neutrality. The Target Size Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Size Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

QLT seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Quality Index (the “Target Quality Index”) by investing at least 80% of its net assets

(plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Quality Index. The Target Quality Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market's overall movements.

The universe for the Target Quality Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index ("universe"). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Quality Index identifies approximately the 20% of the securities with the highest quality ranking within each sector as equal-weighted long positions and approximately the 20% of securities with the lowest quality ranking within each sector as equal-weighted short positions. Above-average quality characteristics are defined as an above-average return on equity and a below-average debt-to-equity ratio. A stock's quality ranking is based on an equally weighted combination of its return on equity (earnings over the last twelve months divided by book value) and debt-to-equity ratios within its sector. Stocks with a higher return on equity and a lower debt-to-equity ratio (above average quality characteristics) within each sector receive higher rankings, and stocks with a lower return on equity and a higher debt-to-equity ratio (below average quality characteristics) within each sector receive lower rankings.

Although it is expected that the Fund's assets will be invested in all of the long and short positions that comprise the Target Quality Index, the Fund may use a sampling strategy to track the performance of the Target Quality Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Quality Index that, collectively, have an investment profile correlated with the Target Quality Index. In either case, the weightings of the long and short positions in the Fund's portfolio may differ from their weightings in the Target Quality Index.

For the Fund, quality investing entails investing in securities that have above-average quality characteristics and shorting securities that have below-average quality characteristics. The performance of the Fund will depend on the differences in the rates of return between these long positions and short positions. For example, in a rising market, if the Fund's long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Quality Index, which the Adviser believes will help the Fund track its Target Quality Index. Such instruments are expected to include long and short common stocks not in the Target Quality Index, derivatives, including swap agreements based on the Target Quality Index and futures contracts on equity indexes, and money market instruments.

The Target Quality Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the highest ranking within that sector as long positions and the 20 securities with the lowest ranking within that sector as short positions. If between

reconstitutions the value of short positions in the Target Quality Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Quality Index will be rebalanced back to equal weights and sector neutrality. The Target Quality Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Quality Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

NOMO seeks to track the performance of the Dow Jones U.S. Thematic Market Neutral Anti-Momentum Index (the "Target Anti-Momentum Index") by investing at least 80% of its net assets (plus any borrowings for investment purposes) in common stock, including the short positions, in the Target Anti-Momentum Index. The Target Anti-Momentum Index is a market neutral index that is dollar-neutral. As such, it identifies long and short securities positions of approximately equal dollar amounts. In choosing to track a market neutral index, the Fund seeks to limit the effects of general market movements on the Fund and to limit the correlation of the performance of the Fund with the market's overall movements.

The universe for the Target Anti-Momentum Index is the top 1,000 eligible securities by market capitalization in the Dow Jones U.S. Index ("universe"). The securities included in the universe are categorized as belonging to one of 10 sectors. The Target Anti-Momentum Index identifies approximately the 20% of the securities with the lowest momentum within each sector as equal-weighted long positions and approximately the 20% of securities with the highest momentum within each sector as equal-weighted short positions. A stock's momentum is based on its total return, which is a function of price performance and dividend returns over the first twelve of the last thirteen months. High momentum stocks are those stocks with higher total returns, and low momentum stocks are those stocks with lower total returns.

Although it is expected that the Fund's assets will be invested in all of the long and short positions that comprise the Target Anti-Momentum Index, the Fund may use a sampling strategy to track the performance of the Target Anti-Momentum Index. A sampling strategy involves investing in a representative sample of the long and short positions in the Target Anti-Momentum Index that, collectively, have an investment profile correlated with the Target Anti-Momentum Index. In either case, the weightings of the long and short positions in the Fund's portfolio may differ from their weightings in the Target Anti-Momentum Index.

For the Fund, anti-momentum investing entails investing in securities that have had below-average recent returns and shorting securities that have had above-average recent returns. The performance of the Fund will depend on the differences in the rates of return between these long positions and short positions. For example, in a rising market, if the Fund's long positions appreciate more rapidly than its short positions, the Fund would generate a positive return, which would be the difference between the rates of return between the long positions and short positions. However, if the opposite occurred, the Fund would generate a negative return.

The Fund expects to invest up to 20% of its total assets in instruments other than the long and short positions in the Target Anti-Momentum Index, which the Adviser believes will help the Fund track its Target Anti-Momentum Index. Such instruments are expected to include long and short common stocks not in the Target Anti-Momentum Index, derivatives, including swap agreements based on the Target Anti-Momentum Index and futures contracts on equity indexes, and money market instruments.

The Target Anti-Momentum Index, which is compiled by Dow Jones Indexes, is equal-weighted and sector neutral – meaning that at each reconstitution of the index, all of the components of the index are equal-weighted and the number of long and short positions in each sector in the index approximate the weighting of that sector in the universe. For example, if a sector in the universe comprises 100 securities, the index would identify the 20 securities with the lowest momentum within that sector as long positions and the 20 securities with the highest momentum within that sector as short positions. If between reconstitutions the value of short positions in the Target Anti-Momentum Index exceeds the value of the long positions by an amount that is established by the index provider, the Target Anti-Momentum Index will be rebalanced back to equal weights and sector neutrality. The Target Anti-Momentum Index is reconstituted monthly.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that its Target Anti-Momentum Index is concentrated. For purposes of this policy, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

For more information regarding each Fund's investment strategy, please read the prospectus for the Funds.

As described more fully in the Trust's prospectus and Statement of Additional Information ("SAI"), the Funds issue and redeem Shares at net asset value ("NAV") only in large blocks of 50,000 Shares (each block of Shares called a "Creation Unit"), or multiples thereof. As a practical matter, only broker-dealers or large institutional investors with creation and redemption agreements (called Authorized Participants) can purchase or redeem these Creation Units. Except when aggregated in Creation Units, the Shares may not be redeemed with the Funds.

Income dividends, if any, are distributed to shareholders annually. Net capital gains are distributed at least annually.

Shares are held in book-entry form, which means that no Share certificates are issued. The Depository Trust Company or its nominee is the record owner of all outstanding Shares of the Funds and is recognized as the owner of all Shares for all purposes.

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day after the close of trading (ordinarily 4:00 p.m., Eastern Time or "ET") of the New York Stock Exchange. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The registration statement for the Funds describes the various fees and expenses for the Funds' Shares. For a more complete description of the Funds and the underlying indexes, visit the Funds' website at www.quant-shares.com.

Purchases and Redemptions in Creation Unit Size

NASDAQ members, BX members and PHLX members and member organizations are hereby informed that procedures for purchases and redemptions of Shares in Creation Unit Size are described in the Trust's prospectus and Statement of Additional Information and that Shares are not individually redeemable but are redeemable only in Creation Unit Size aggregations or multiples thereof.

Principal Risks

Interested persons are referred to the discussion in the prospectus for the Funds of the principal risks of an investment in the Funds. These include tracking error risk (factors causing a Fund's performance to not match the performance of its underlying index), market trading risk (for example, trading halts, trading above or below net asset value), investment style risk, sector risk, investment approach risk, non-diversification risk, issuer-specific risk, management risk, derivatives risk and leverage risk.

Exchange Rules Applicable to Trading in the Shares

Trading in the Shares on NASDAQ is on a UTP basis and is subject to NASDAQ equity trading rules. Trading of the Shares on BX is on a UTP basis and is subject to BX equity trading rules. Trading of the Shares on PHLX's PSX system is on a UTP basis and is subject to PHLX rules.

Trading Hours

The values of each index underlying the Shares are disseminated to data vendors every 15 seconds. The Shares will trade on NASDAQ between 7:00 a.m. and 8:00 p.m. ET. The Shares will trade on BX between 8:00 a.m. and 7:00 p.m. ET. The Shares will trade on PSX between 9:00 a.m. and 5:00 p.m. ET. For trading during each market's pre-market and post-market sessions, market participants should note that additional risks may exist with respect to trading the Funds during these sessions, when the underlying index's values, intraday indicative value, or similar value may not be disseminated or calculated.

Dissemination of Fund Data

The Consolidated Tape Association will disseminate real time trade and quote information for the Funds to Tape B.

Fund Name	Listing Market	Trading Symbol	IOPV Symbol	NAV Symbol
QuantShares U.S. Market Neutral Momentum Fund	NYSE Arca	MOM	MOM.IV	MOM.NV

QuantShares U.S. Market Neutral Size Fund	NYSE Arca	SIZ	SIZ.IV	SIZ.NV
QuantShares U.S. Market Neutral Quality Fund	NYSE Arca	QLT	QLT.IV	QLT.NV
QuantShares U.S. Market Neutral Anti-Momentum Fund	NYSE Arca	NOMO	NOMO.IV	NOMO.NV

Suitability

Trading in the Shares on NASDAQ will be subject to the provisions of NASDAQ Rule 2310. Trading in the Shares on BX will be subject to the provisions of BX Equity Rule 2310. Shares trading on PSX will be subject to the provisions of PHLX Rule 763. Members and member organizations recommending transactions in the Shares to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the “know your customer” obligation that is embedded in both the NASDAQ Conduct Rules and the BX Conduct Rules.

NASDAQ members, BX members and PHLX members and member organizations should also review NASD Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

Trading Halts

NASDAQ will halt trading in the Shares of a Fund in accordance with NASDAQ Rule 4120. BX will halt trading in the Shares of a Fund in accordance with BX Equity Rule 4120. PHLX will halt trading in the Shares of a Fund in accordance with PHLX Rule 3100. The grounds for a halt under these rules include a halt by the primary market because the intraday indicative value of the Fund, the value of its underlying index, or a similar value are not being disseminated as required, or a halt for other regulatory reasons. In addition, NASDAQ, BX and PHLX will also stop trading the Shares of a Fund if the primary market delists the Fund.

Delivery of a Prospectus

NASDAQ members, BX members and PHLX members and member organizations should be mindful of applicable prospectus delivery requirements under the federal securities laws with respect to transactions in the Funds.

Prospectuses may be obtained through the Funds' website. The prospectus for the Funds does not contain all of the information set forth in the Funds' registration statement (including the exhibits to the registration statement), parts of which have been omitted in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). For further information about the Funds, please refer to the registration statement.

In the event that the Funds rely upon an order by the SEC exempting the Shares from certain prospectus delivery requirements under Section 24(d) of the 1940 Act and in the future make available a written product description, NASDAQ Rules 5705 and 5740, BX Equity Rules 4420 and 4421, and PHLX Rule 803 require that members and member organizations, respectively, provide to all purchasers of Shares a written description of the terms and characteristics of such securities, in a form prepared by the Trust for the Funds, no later than the time a confirmation of the first transaction in the Shares is delivered to such purchaser. In addition, members and member organizations shall include such a written description with any sales material relating to the Shares that is provided to customers or the public. Any other written materials provided by members or member organizations to customers or the public making specific reference to the Shares as an investment vehicle must include a statement in substantially the following form: "A circular describing the terms and characteristics of the Shares of the Fund has been prepared by the Trust and is available from your broker. It is recommended that you obtain and review such circular before purchasing Shares of the Fund. In addition, upon request you may obtain from your broker a prospectus for Shares of the Fund."

Any NASDAQ, BX or PHLX member or member organization carrying an omnibus account for a non-member broker-dealer is required to inform such non-member that execution of an order to purchase Shares for such omnibus account will be deemed to constitute agreement by the non-member to make such written description available to its customers on the same terms as are directly applicable to NASDAQ members, BX members and PHLX members or member organizations under this rule.

Upon request of a customer, NASDAQ members, BX members and PHLX members or member organizations shall provide a copy of the prospectus.

Exemptive, Interpretive and No-Action Relief Under Federal Securities Regulations

The SEC has issued exemptive, interpretive or no-action relief from certain provisions of rules under the Securities Exchange Act of 1934 (the "Act") regarding trading in the above mentioned exchange-traded Funds.

Regulation M Exemptions

Generally, Rules 101 and 102 of Regulation M prohibit any "distribution participant" and its "affiliated purchasers" from bidding for, purchasing, or attempting to induce any

person to bid for or purchase any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities.

The SEC has granted an exemption from Rule 101 under Regulation M to permit persons participating in a distribution of shares of the above-mentioned Funds to engage in secondary market transactions in such shares during their participation in such a distribution. In addition, the SEC has granted relief under Regulation M to permit persons who may be deemed to be participating in the distribution of Shares of the above-mentioned Funds (i) to purchase securities for the purpose of purchasing Creation Unit Aggregations of Fund Shares and (ii) to tender securities for redemption in Creation Unit Aggregations. Further, the SEC has clarified that the tender of Fund Shares to the Funds for redemption does not constitute a bid for or purchase of any of the Funds' securities during the restricted period of Rule 101. The SEC has also granted an exemption pursuant to paragraph (e) of Rule 102 under Regulation M to allow the redemption of Fund Shares in Creation Unit Aggregations during the continuous offering of Shares.

Customer Confirmations for Creation or Redemption of Fund Shares (SEC Rule 10b-10)

Broker-dealers who handle purchases or redemptions of Fund Shares in Creation Unit size for customers will be permitted to provide such customers with a statement of the number of Creation Unit Aggregations created or redeemed without providing a statement of the identity, number and price of shares of the individual securities tendered to a Fund for purposes of purchasing Creation Unit Aggregations ("Deposit Securities") or the identity, number and price of shares to be delivered by the Trust for the Fund to the redeeming holder ("Redemption Securities"). The composition of the securities required to be tendered to the Fund for creation purposes and of the securities to be delivered on redemption will be disseminated each business day and will be applicable to requests for creations or redemption, as the case may be, on that day. This exemptive relief under Rule 10b-10 with respect to creations and redemptions is subject to the following conditions:

- 1) Confirmations to customers engaging in creations or redemptions must state that all information required by Rule 10b-10 will be provided upon request;
- 2) Any such request by a customer for information required by Rule 10b-10 will be filed in a timely manner, in accordance with Rule 10b-10(c);
- 3) Except for the identity, number and price of shares of the component securities of the Deposit Securities and Redemption Securities, as described above, confirmations to customers must disclose all other information required by Rule 10b-10(a).

SEC Rule 14e-5

An exemption from Rule 14e-5 has been granted to permit any person acting as a dealer-manager of a tender offer for a component security of a Fund (1) to redeem Fund Shares in Creation Unit Aggregations from the issuer that may include a security subject to such

tender offer and (2) to purchase Fund Shares during such tender offer. In addition, a no-action position has been taken under Rule 14e-5 if a broker-dealer acting as a dealer-manager of a tender offer for a security of a Fund purchases or arranges to purchase such securities in the secondary market for the purpose of tendering such securities to purchase one or more Creation Unit Aggregations of Shares, if made in conformance with the following:

- 1) such bids or purchases are effected in the ordinary course of business, in connection with a basket of 20 or more securities in which any security that is the subject of a distribution, or any reference security, does not comprise more than 5% of the value of the basket purchased; or
- 2) purchases are effected as adjustments to such basket in the ordinary course of business as a result of a change in the composition of the underlying index; and
- 3) such bids or purchases are not effected for the purpose of facilitating such tender offer.

Section 11(d)(1); SEC Rules 11d1-1 and 11d1-2

Section 11(d)(1) of the Act generally prohibits a person who is both a broker and a dealer from effecting any transaction in which the broker-dealer extends credit to a customer on any security which was part of a new issue in the distribution of which he participated as a member of a selling syndicate or group within thirty days prior to such transaction. The SEC has clarified that Section 11(d)(1) does not apply to broker-dealers that are not Authorized Participants (and, therefore, do not create Creation Unit Aggregations) that engage in both proprietary and customer transactions in Shares of the Fund in the secondary market, and for broker-dealer Authorized Participants that engage in creations of Creation Unit Aggregations. This relief is subject to specific conditions, including the condition that such broker-dealer (whether or not an Authorized Participant) does not, directly or indirectly, receive from the fund complex any payment, compensation or other economic incentive to promote or sell the Shares of a Fund to persons outside the fund complex, other than non-cash compensation permitted under NASD Rule 2830(I)(5)(A), (B) or (C). (See [letter](#) from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.) The SEC also has taken a no-action position under Section 11(d)(1) of the Act that broker-dealers may treat Shares of a Fund, for purposes of Rule 11d1-2, as "securities issued by a registered open-end investment company as defined in the Investment Company Act" and thereby extend credit or maintain or arrange for the extension or maintenance of credit on Shares that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

SEC Rule 15c1-5 and 15c1-6

The SEC has taken a no-action position with respect to Rule 15c1-5 and Rule 15c1-6 as to the required disclosure of control by a broker or dealer with respect to creations and redemptions of Fund Shares and secondary market transactions therein. (See [letter](#) from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.)

This Information Circular is not a statutory prospectus. NASDAQ members, BX members and PHLX members and member organizations should consult the Funds' prospectus and/or the Funds' website for relevant information.
